

REGENCY 10' SET-UP INSTRUCTIONS

Sides swing forward after top section is joined. Be sure to leave some angle to the panels until the end panels are attached.

Curved end panels. Top panels have stacking pins attached.

- 1. Unpack display and locate parts.**
- 2. Set up 8-panel section of display in the middle of the 10' backwall of booth.**
Stand up the base section (the panels with the foot channel on the bottom) and insert the stacking guides in to the tops of the panels.
- 3. Stack top 4-panel section onto base panels.**
Leave the panels in a slight zig-zag setup until the curved end panels are attached.
- 4. Attach the flexible marble end panels to the rigid panels to form half round end caps.**
- 5. Slide "U" channels of base left end cap onto the left side of the display, repeat with right side. Stack upper column on base column by aligning pins and stacking guide in panel.**
- 6. With Curved ends attached, carefully open display to straighten out the backwall.**
- 7. Assemble door panels by sliding "U" channels onto the sides of each panel and attaching panels to the center "H" channel.** *Note: The "U" channels will have Velcro attached to the outside edge for joining to display.*
- 8. Set completed door assembly in place and attach the two counter support panels between the backwall and the door assembly.**
There is a velcro strip on either end of the support panel.
- 9. Open the countertop and set into place on top of the door panel and support panels.**
Attach header and lightbars to complete set-up.
